## **WHY HAVE A VIAL OF LIFE?**

When emergencies happen, 9-1-1 responders need medically related information so that they can begin measures to assist recovery. For most of us, in a crisis, remembering data may be difficult. You may be unable to speak, be by yourself or have a complicated medical history. The purpose of the Vial of Life is to quickly and accurately provide your important information to those who need it to help you in an emergency.

## **WHAT IS A VIAL OF LIFE?**

The Vial of Life is a plastic tube with red caps on either end. It includes an information form for you and your pets. Place it inside the tube and put it in a visible spot inside of your refrigerator front door. The red sticker goes outside the refrigerator door. Emergency responders know to look for the Vial of Life when they are called into Sun City.

**Email us at [EPC@scpdca.com](mailto:EPC@scpdca.com) for a Vial of Life (\$5) or for more information.**
