

EMERGENCY PREPAREDNESS

Those Flashing Lights!

You may have wondered about those signs with the flashing lights that are located in the Del Webb median strip in front of each clubhouse.

The answer is they are part of AM 1620, the Sun City low power radio broadcast station, which alerts you to disaster situations in our Sun City community. On occasion they may be tested, such as the practice drills held by the Emergency Preparedness team.

IF AM 1620 HAS BEEN ACTIVATED

- When you see those flashing lights, you should tune in AM 1620. If power is out, use the radio in your car or one which is battery or hand operated.
- During a disaster, radio operators will activate the station and will broadcast both pre-recorded and live messages that will alert residents of the conditions affecting Sun City.
- If interested in helping with the AM 1620 Radio Team, contact Scott at Radio.EPC@scpdca.com
