

Emergency Preparedness Operations Center Teams

Can you help the **GENERATOR TEAM** who maintains the generator that powers the SCPDCA Emergency Operations Center? In a disaster, they also deploy portable generators that provide power and lighting to key areas, like the main gates, First Aid Stations and AM 1620. Additional fuel is provided to these areas as it is needed.

Our **GATE TEAM** helps stabilize the security of our community by assisting Community Patrol at the main and north gates on Del Webb and securing the other 3 vehicle gates that will not be manned. Once trained, this team has a minimal time commitment until we have a major incident.

It's all about **TEAM WORK!**
Join us as we help Sun City
to recover in a disaster.
