

EMERGENCY PREPAREDNESS

Those Flashing Lights!

You may have wondered about those signs with the flashing lights that are located in the Del Webb median strip in front of each clubhouse. They come on during a disaster or a practice drill.

➤ Those flashing lights indicate that AM 1620, the Sun City low power radio broadcast station, has been activated and will alert you to disaster situations in our community. You should immediately tune in AM 1620. If your power is out, use the car radio or one which is battery or hand operated.

➤ During a disaster, radio operators will activate the station and broadcast both pre-recorded and live messages that will alert residents of the conditions affecting Sun City.

➤ WE NEED HELP IN THE AM 1620 RADIO STATION. We train—no experience in this area is necessary.
