

Emergency Preparedness

Why have a Vial of Life?

During emergencies, the 9-1-1 responders need your important medical information to assist in recovery, but you may be unable to speak. The Vial of Life will provide your information quickly and accurately to those who need it to help you in an emergency.

What is a Vial of Life?

The Vial of Life is a plastic tube that has your medical information & emergency contacts in it. It is easy for emergency responders to find— because it goes in your refrigerator door! Bonus: A pet information form is also included.
